

NORILSK NICKEL HARJAVALTA HYDROXYCARBONATE PASTE

Norilsk Nickel Harjavalta Oy Finland

Typical Chemical Composition (%) NICKEL HYCROXYCARBONATE PASTE

Ni	40,7
Al	0,0004
Ca	0,0051
Cl	0,0002
Co	0,0002
Fe	0,0002
Mg	0,0009
Na	0,0154
P	0,0002
S	0,0098
Si	0,0002
As, Cd, Cr, Cu, K, Mn, Pb, Sb, Se, Zn	<0,0001
instHCl	0,0014
TOC	0,0019

Applications

- Electroplating
- Electrogalvanizing
- Powder metallurgy
- Ceramics
- Catalysts

Product description

Norilsk Nickel's Hydroxycarbonate Paste is produced in Harjavalta, Finland, in the world's most modern nickel chemical factory. It is characterized by high purity and consistent quality.

Nickel Hydroxycarbonate Paste is a product with light green colour and fine particle size. It is water-insoluble, but soluble in acids. The product is made under automated process control to ensure the high and stable quality. Due to lower nickel content than in hydroxycarbonate powder the dusting is lower during material handling in process. It is mainly used in catalysts and ceramics.

NORNICKEL Nickel Hydroxycarbonate production is in compliance with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018.

One of the lowest carbon footprint in the industry.

Packing

15 kg bags, 35 bags on wooden pallet =525 kg

500 kg big bags on wooden pallet
